Dear Ms. Parham:

This concerns the March 12, 1991, Environmental Protection Agency (EPA) inspection performed by W. Douglas Smith at the General Services Administration's facility located at 4735 East Marginal Way South, Seattle, Washington. The inspection was carried out to determine compliance with the PCB (polychlorinated biphenyl) Regulations adopted by EPA pursuant to the Toxic Substances Control Act (TSCA).

We have now completed a review of Mr. Smith's report on this inspection and are pleased to inform you that no apparent violations of the PCB Regulations were documented.

If you have any questions regarding the inspection or the PCB Regulations, please contact Eileen Hayes, EPA Region 10, Pesticides and Toxic Substances Section, Mail Stop AT-083, 1200 Sixth Avenue, Seattle, Washington 98101; telephone (206) 553-2584.

Sincerely,

Gil Haselberger, Chief
Toxic Substances Section
